

Automated **Vulnerability** Management for Application and Cloud Infrastructure

**Scan Application and Cloud Infrastructure
all in one platform, with one-time integration.**

What is ArmourZero?

ArmourZero is an **AI automated vulnerability management platform** that helps secure your web & mobile applications, domains, and cloud infrastructures — seamlessly in one place.

Simplified Setup with Effortless Integration

Just do a one-time integration to scan and get real-time insights continuously.

What's Included?

</> **Code Scanning**

Scan your web and mobile application's code for any vulnerabilities and security weaknesses via SAST, SCA, Secret Scan, and IaC to address risks aligned with the OWASP Top 10.

</> **Cloud Infrastructure Scanning**

Identify misconfigurations, exposed services, and security gaps across your cloud infrastructures, including leading platforms such as AWS and Azure.

</> **Web Domain Scanning**

Scan your public web domains using DAST to identify security vulnerabilities like injection flaws, broken authentication, and other runtime threats.

</> **Built-in Task Management**

Collaborate seamlessly across Developer, Risk, Operations, and Security teams. Easily assign, track, and resolve issues within the platform, ensuring accountability and faster response times.

</> **AI False Positive Detection**

Leverage AI-driven false positive detection to reduce alert fatigue, save investigation time, and help your security team focus on what truly matters.

</> **AI-Powered Remediation Suggestions**

Get smart, actionable steps to rapidly remediate vulnerabilities with AI-powered suggestions, whether in development, staging, or production.

Key Benefits

Know Your Vulnerabilities in Real Time

No more manual scans. Detect vulnerabilities early with automated, continuous scanning, helping you prevent security incidents and avoid costly outages.

Prioritise Critical Risks Faster

Automatically identify and categorise vulnerabilities by CWE and CVE severity, aligned with OWASP Top 10, so you can focus on what matters most.

Save Time with One-Time Integration

Streamline workflows with one-time integration to GitHub, GitLab, Bitbucket, Azure Pipeline, and more for effortless automated scanning.

Accelerate Fixes with AI-Powered Precision

Quickly resolve security findings and reduce false positives with AI-powered remediation suggestions, keeping your team efficient, focused, and productive.
